Intentional Culture

“

The minute your students first set foot in your class, they are adapting to your classroom culture. Your classroom culture consists of all the beliefs, perceptions, and assumptions that you and your students share. As Seth Godin says, the meaning of culture is “People like us do things like this.”

Whether you realize it or not, your classroom does have a culture. The only question is whether you are cultivating the culture of your classroom, or simply hoping for the best.

If you aren't intentional about it, you may end up with a classroom culture that doesn't support your goals or your students' needs.”

CONNECT, EXTEND, CHALLENGE

How are the ideas and information **connected** to what you already knew?

What new ideas did you get that broadened your thinking or **extended** it in different directions?

What **challenges** or puzzles emerge for you?

Connect - Extend - Challenge

How are the ideas and information presented connected to what you already knew?

What new ideas did you get that extended or broadened your thinking in new directions?

What challenges or puzzles have come up in your mind from the ideas and information presented?

purpose

This routine helps learners make connections between new ideas and prior knowledge. It also encourages them to take stock of ongoing questions, puzzles and difficulties as they reflect on what they are learning.

The Physical Environment

A photograph of a modern, multi-level classroom interior. In the foreground, a group of children are gathered around a white table, engaged in an activity. A large, light blue pyramid-shaped structure is the central feature, with a ramp leading up to a second level where more children are playing. The ceiling is high with exposed white pipes and modern lighting fixtures. The overall atmosphere is bright and open, emphasizing a social and collaborative learning environment.
